

Major Development Opportunity
Waverly Street
Route 135
Framingham, MA 01702

FOR SALE

Downtown Framingham
Central Business District and Opportunity Zone
REDEVELOPMENT OPPORTUNITY

5 Parcels—1.433 Acres Route 135 Frontage and Corner Lot and Side Street Access

This is a one-of-a-kind development opportunity. Located in the heart of Framingham's rapidly revitalizing downtown, these 5 contiguous properties have Route 135 frontage a corner lot and side street access. Downtown Framingham has seen over \$600M in private investment and another \$10M in public streetscape improvements in the past few years. These properties are located in an Opportunity Zone and Framingham's Central Business District and sits two blocks from the busiest commuter rail stop on the MBTA system. The properties are also only one block from the Regional Transit Authority. The same broker is representing both owners.

Full zoning information can be viewed at <http://www.framinghamma.gov/>

The information contained herein is from sources deemed reliable, but not guaranteed for accuracy. All potential buyers or lessees should conduct their own independent due diligence prior to or subject to making an offer.

Central Business: CB

The purpose of the Central Business (CB) District is to stimulate a pedestrian- and transit-oriented, mixed-use environment that is supported by a mixture of residential, retail, office, and other commercial uses. The CB District encourages a compact, transit-oriented development setting while preserving the area as the Town's financial, civic, cultural, and government center. The CB District is intended to generate a livable downtown environment with a strong presence of a multitude of activities that increase pedestrian access and reduce the number of auto-oriented uses. Development should preserve the historic nature and architecturally significant buildings within the CB District, while promoting new and infill development to support a multi-modal transportation, mixed-use environment.

CENTRAL BUSINESS DISTRICT

1. The Central Business (CB) District design standards have been developed to promote quality development that preserves and enhances Downtown Framingham's history and character; and further encourages a walkable, pedestrian- and transit-oriented environment. These design standards are integral to the CB District regulations and must be met as part of any CB District site plan review and approval
2. The Planning Board may require applicants, in need of a special permit for use in the CB District, to utilize façade easements in order to protect the values of historic structures. Such requirement would be applicable only where a development proposal, associated with such special permit, would result in the demolition or major exterior renovation of buildings, which are listed on the Inventory of Cultural Resources or are in a National Register District.
3. To further enhance the development of the CB District applicants are encouraged to utilize the "Downtown Framingham Design Guidelines," Article 18 of the Planning Board's Rules and Regulations.
4. Development within the CB District that requires site plan review and/or special permit shall be subject to the following design regulations. The Town encourages projects that do not require site plan review and/or special permit approval to incorporate the design regulations and standards into their projects.
 - a. Building Scale
 - 1) The base, middle, and top areas of a building shall be clearly delineated through the use of architectural features.
 - 2) Ground level ceiling heights along primary roadways (Concord Street, Union Avenue, Waverly Street, and Hollis Street) shall be a minimum of 14 feet to accommodate retail uses.
 - 3) New buildings' heights may differ, but shall reflect the height of adjacent buildings through aligning façade elements (e.g. cornices), or use of stepbacks to reinforce the scale, massing, and proportions of existing structures.

b. Facades

- 1) Buildings more than 50 feet in width shall be broken into bays to reflect the historic building rhythm of Downtown Framingham.
- 2) Flat facades shall be discouraged by the use of balconies, change of materials, or architectural detailing to provide visual appeal and to break down the building scale.
- 3) Blank wall surfaces greater than 20 feet in width are prohibited when visible from the street.
- 4) Sides of buildings with frontage on a street shall include windows and may include doors, as needed, along with architectural features that create interest to the less visible portion of the building.

c. Windows 1) Façades along primary downtown streets (Concord Street, Union Street, Waverly Street and Hollis Street) shall incorporate no less than 60 percent transparent glazing on the ground floor to maximize visibility of street level uses.

- 2) Façades along secondary streets shall incorporate no less than 40 percent transparent glazing on the ground floor.
- 3) No portion of the façade shall be constructed of glass that prevents pedestrian visibility of interior ground floor activities.
- 4) Upper floor windows shall not be larger than ground floor windows.
- 5) Wherever possible, window styles shall be compatible with the historic style of adjacent structures.

d. Entrances

1) Building Entrances

- i. Primary building entrances shall be located on public sidewalks/streets, or on corners wherever possible to emphasize the pedestrian environment.
- ii. Doorways to upper floors shall be separate from ground level retail entrances.
- iii. Doors shall not extend beyond the exterior façade into pedestrian pathways.

2) Parking Garage Entrances i. Parking garage entrances shall be sited in locations that minimize conflict and impacts between pedestrians and vehicles.

- ii. Audible notification and clearly visible signage shall be installed to inform pedestrians when vehicles are exiting the structure.

e. Parking

1) To encourage an active, pedestrian environment, vehicle parking shall be located behind or to the side of buildings whenever possible. Below grade and structured parking are encouraged.

f. External Materials: 1) Building materials shall reflect the character of Downtown Framingham. Pre-dominant wall materials utilized within the CB District are brick, stone, and pre-cast concrete.

2) Fiber board/fiber cement board and wood siding are encouraged adjacent to residential districts.

3) The use of simulated and/or prefabricated brick or stone, particle board, plywood, and/or aluminum and vinyl siding are strongly discouraged.

g. Awnings and Canopies 1) Awnings and canopies are encouraged to enliven the ground floor and to provide shelter for ground floor outdoor uses such as dining.

h. Roof Form

1) Roof forms and lines should complement adjacent buildings within the CB District.

2) Variations in height are encouraged through the use of architectural elements that may include cornices and parapets. These architectural features shall create interesting and varied rooflines.

3) Rooftop mechanical equipment shall be screened and designed as a component of the overall roof design. It shall not appear to be an add-on element.

4) Rooftop screening and mechanicals shall be designed to accommodate soundproofing.

i. Service Areas, Utilities, and Mechanical Equipment 1) Service and loading areas, utilities, and mechanical equipment shall be located on the side or rear of a building. These features shall be sufficiently screened using architectural forms, fencing and/or landscaping so as to not be visible from streets and public open spaces.

2) Service areas, utilities, and mechanical equipment shall be designed to accommodate soundproofing.

3) Chain linked fencing shall not be permitted for screening.

j. Sidewalks

1) Sidewalks shall provide adequate space for all users, street furniture, trees/plantings, bicycle parking, and/or restaurant seating as part of the project.

2) Where appropriate, front setbacks should be used to accommodate plantings and/or outdoor restaurant seating.

k. Signage.

1) All signage design and deployment shall comply with the Town's Sign By-Law.

5. Central Business Parking Regulations

a. Off-Street Parking Requirements

1) Residential Parking Requirements:

- i. Residential structures and the residential component of mixed-use structures shall comply with the Residential Off-street Parking Requirements Table, herein.
- ii. On-site parking requirements may be reduced as determined by the Planning Board if an off-street public parking lot of 20 spaces or more exists within 300 feet of the principal use, and the public parking lot has ample spaces available to serve the immediate area as determined by a survey of occupancy and usage.
- iii. The Planning Board shall maintain an inventory of off-street public parking spaces as a basis to fulfill residential parking requirements. This inventory shall preclude the allocation of the same off-street public parking spaces to more than one residential project.
